

Milliman Managed Risk Strategy[®]

The Milliman Managed Risk Strategy[®] (MMRS) is a customizable dynamic portfolio risk management strategy that seeks to:

Prevent portfolio volatility from exceeding a designated threshold

Capture long-term growth in up markets

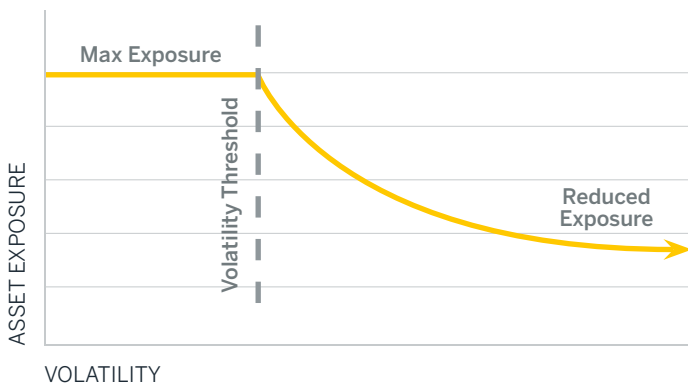

Defend against losses during sustained market declines

TWO COMPONENTS: ONE STRATEGY

MMRS consists of two integrated and flexible components that work in tandem to pursue the objectives behind the design.

1. Volatility Management

The volatility management component regulates portfolio volatility. It can be tailored to either proactively conform to risk limits, or to monitor with a “light touch” that steps in only when needed to meet investment guidelines.

2. Capital Protection Strategy

The capital protection strategy (CPS) component produces an additional cushion against losses during significant and sustained market declines. This is achieved through tail hedging rooted in dynamic put option replication techniques.

For illustrative purposes only, does not represent the performance of any actual investment or portfolio, and should not be viewed as a recommendation to buy/sell.

Each MMRS implementation provides a customized approach designed to meet end user investment and risk management objectives. This is achieved by dynamically managing investment exposures, either by directly trading portfolio assets or through the use of capital efficient derivatives such as futures and options (when permitted by investment guidelines).

MILLIMAN CAPABILITIES

Milliman can manufacture its managed risk strategies across diverse asset classes, using a variety of instruments, offered in a range of product structures. Through its trading desks, located strategically in Chicago, London, and Sydney, Milliman FRM is positioned to carry out the management and trading for managed risk strategies around the clock and the globe.

This material is not intended to be a recommendation, offer, solicitation or advertisement to buy or sell any securities, securities related product or service, or investment strategy, nor is it intended to be relied upon as a forecast, research or investment advice.

The products or services described or referenced herein may not be suitable or appropriate for the recipient. Many of the products and services described or referenced herein involve significant risks, and the recipient should not make any decision or enter into any transaction unless the recipient has fully understood all such risks and has independently determined that such decisions or transactions are appropriate for the recipient. Investment involves risks. Any discussion of risks contained herein with respect to any product or service should not be considered to be a disclosure of all risks or a complete discussion of the risks involved. Investing in foreign securities is subject to greater risks including: currency fluctuation, economic conditions, and different governmental and accounting standards. There are risks associated with futures contracts. Futures contract positions may not provide an effective hedge because changes in futures contract prices may not track those of the securities they are intended to hedge. Futures create leverage, which can magnify the potential for gain or loss and, therefore, amplify the effects of market, which can significantly impact performance. There are also risks associated with investing in fixed income securities, including interest rate risk, and credit risk.

The recipient should not construe any of the material contained herein as investment, hedging, trading, legal, regulatory, tax, accounting or other advice. The recipient should not act on any information in this document without consulting its investment, hedging, trading, legal, regulatory, tax, accounting and other advisors. Information herein has been obtained from sources we believe to be reliable but neither Milliman Financial Risk Management LLC ("Milliman FRM") nor its parents, subsidiaries or affiliates warrant its completeness or accuracy.
